

## QUALITY POLICY OF VÁLVULAS NACIONAL, S.A.

VÁLVULAS NACIONAL, S.A. is a company dedicated to the design, manufacture, reparation and marketing of safety and relief valves, offering its products and services for customers all over the world. The company employs a staff of highly trained professionals.

Our company is primarily focused on providing high quality products to all kinds of industries, where protection of installations against unwanted pressure changes is needed. Our core business is the manufacture of safety and relief valves for oil and gas industry, although our presence increases in the field of renewable energy. Over time and gaining experience VÁLVULAS NACIONAL, S.A. wants to be leading supplier of safety and relief valves for all kinds of industries.

In order to improve our performance, the company has accepted and implemented quality management system that has been certified by ISO 9001:2015 standard. The general management of VÁLVULAS NACIONAL, S.A. declares its willingness to ensure compliance with the quality management system by means of the following commitments:

1. Identify and satisfy the requirements of our present and future customers.
2. Comply with the legal requirements applied in the sector.
3. Comply with the voluntary requirements that have been accepted for the continuous improvement.
4. Gain international experience by forming a part of a union of valves manufactures (Pekos Group).
5. Promote dissemination and comprehension of our quality policy inside and outside of the company, to our employees, suppliers and other interested parties.
6. Certify our products with strict standards to broaden the offer and meet customer requirements.
7. Identify training needs of our staff and ensure its increase in the sector.
